T-Brick is an exterior material developed by EUTO. It is produced according to the systematic production line and quality control based on the international standard, strictly followed by the test method of ISO 10545, KS, JIS and the quality standard of ISO 13006. T-Brick is an eco-friendly product by EUTO which provides natural colours of soil. This dry type material using Open Joint application is good for both interior and exterior spaces. Water repellency of its surface is excellent to prevent pollution. The metal sub-frames are made of stainless steels and galvalume for flexibility of economical construction.

INSTALLATION DIAGRAM

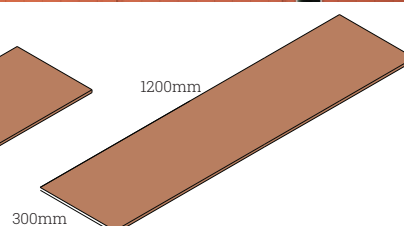

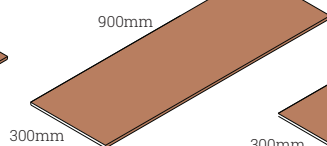

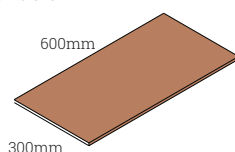

TERASOLID

Terracotta System Panel

Range of expression for construction is wide because of the easiness of panels overlapping and cutting process. The best advantage is anyone can replace it when damages happen. By adding technology to clay. Its increase the durability for the temperature changes throughout all seasons. Open joint construction helps to circulate the air and maintain a clean surface from contamination.
