

# VOL.2 YOHEN JAPANESE PORCELAIN TILE

POOL TILE

YOHEN SINGLE COLOUR • YOHEN RANDOM MIX SERIES  
With Dovetail Interlocking Joint Technology Concept

2022/23

## TN CORPORATION

TN Corporation Japan, is dedicated in producing tiles of the highest quality. Application areas not just limited to the swimming pool but extends to include interior and exterior floor and wall usage. Choosing the right quality tiles is utmost importance. The color of your pool water should be relaxing, uplifting, inviting – and of course, fun. It's no secret that colors impact our moods. The cool colors like blues and greens create a calming atmosphere, which therapists say has a positive impact on our mental health.

## Yohen Japan Porcelain

The word Yohen in Japan ceramic thermology means "an unexpected changes in colour during firing of a pottery or mosaic tiles". The changes in the colour was done by Oxidation/Reduction firing technics couple with unique Japanese glaze. Hence the end result give the pottery of mosaic tile a sparkling, twinkling, natural shading and crystal like effect in every piece of the pottery and mosaic tiles. Every piece of the pottery and mosaic tile will have its own unique colours and shading.

## "Dovetail" interlocking joint concept

Dovetail is an interlocking joint concept between mosaic and adhesive. In Japan modern building all mosaic and tile is made with Dovetail interlocking concept especially with swimming pool and external wall application. Its capable to withstand extreme weather, earthquake and typhoon which mostly happen in Japan. As the technology passes to other country such as Malaysia with unconditional hot and humid weather, "Dovetail" interlocking concept is main advantage to improve adhesion and prevent tile from falling.

Example of "Dovetail" at the back of TN yohen porcelain mosaic tile

### Advantages :

- The interlocking dovetail joint has a more grip than conventional tile.
- Provide longterm durability in unconditional weather.
- Adhesion between adhesive and tile will be strengthen and resist being pulled apart.

## TIPS : How to choose and match your pool colour

it's often difficult to judge how certain tile colours will look in a swimming pool filled with water. Searching through many different tones of blues and greens from numerous samples and swatches can make the decision even more confusing especially when you also need to consider how colours can change when in water. And on top of that, it's important to remember that the colour of your pool can be affected by a number of different outdoor elements such as the colour of the sky at any given time, shadowing from trees and buildings and the depth of the pool. The surrounding colours in terms of coping, paving and house can also influence the tone of colour in the pool.

**YOHEN** tiles are produced by using a special glaze and by slow baking over 20 hours. The resulting deep colors will never be achieved by a short-time kiln process. The variations include 90 colors.

Choose your colour from 90 colours

Choosing tile colors for your pool is fun and creative. Simply, we recommend Yohen single colour and Yohen random mix that will works well for your swimming pool and is something that you'll enjoy looking at every day. These parameters will help you narrow your choices.
